REMARKS / ARGUMENTS

Summary:

The prior art of Homel et al # US 5,082,171 does not provide the same descent/ascent feature as the "Fit N' Bag."

It does not serve the same purpose nor is it constructed in the same or like manner. Merely having a supported collapsible bag serving as a book return, does not address the many possible uses of the "Fit N' Bag" receptacle liner in application # 10/692,485.

Some other uses for the liner are in household laundry hampers, deep bottomed storage bins etc.

These differences with the aforementioned benefits and use possibilities make the "Fit N' Bag" of application # 10/692,485 patentable.

Respectfully Submitted,
Carlos J. Negron
Patent Application # 10/692,485

A handwritten signature in black ink, appearing to read 'Carlos J. Negron', with a long horizontal line extending to the right.
